dKin Caps

A young and inspiring organisation whose primary purpose is to bring you the highest quality headwear available.

Javascript Loops: Cap Wearing Planner

A web page can provide helpful services to users, as well as various was to present complex informaiton. Here, we want to provide a user with a planner for wearing their special caps. By asking for the number of weeks the plan should cover, and the number of caps to cycle through, a table is generated showing the sequence of caps to wear on which day of the week. **NOTE:** The user should only be able to input valid numbers for the input fields. For example, the following consstraints should be applied:

- the number of weeks to display should be between 1 and a maximum of 52
- the number of caps to display should be between 1 and a maximum of 10

With an error being displayed if it is outside these bounds.

Input Fields

How many **weeks** in the schedule?

5

How many **caps** in the schedule?

5
